DBMS ASSIGNMENT 2

SECTION A

Q fill ups.

1. ER Diagram
2. Relational
3. Object-Oriented Model
4. Integrity Constraints

SECTION B

Q2. In a healthcare system, discuss how data abstraction can simplify the interaction b/w healthcare professional & patient records

Ans Data abstraction hides complex database details & shows only necessary information to users

In a healthcare system:

- Doctors see patient diagnosis reports & treatment history without about database structure.
- Nurses access patient vitals & medication schedules
- Receptionists manage ~~vitals & medi~~ appointments & patient registration
- Administrators handle billing & hospital records.

→ Improved Data Security : Sensitive information such as diagnosis or person information is safe.

Q3. Explore the potential benefits & challenges associated with implementing data abstraction in this context

Benefits - Improve data security & privacy
simplifies system usage
Allows faster access to relevant information
Reduces system complexity.

Challenges - High implemention cost.
System design can be complex
Requires training for teaching staff.

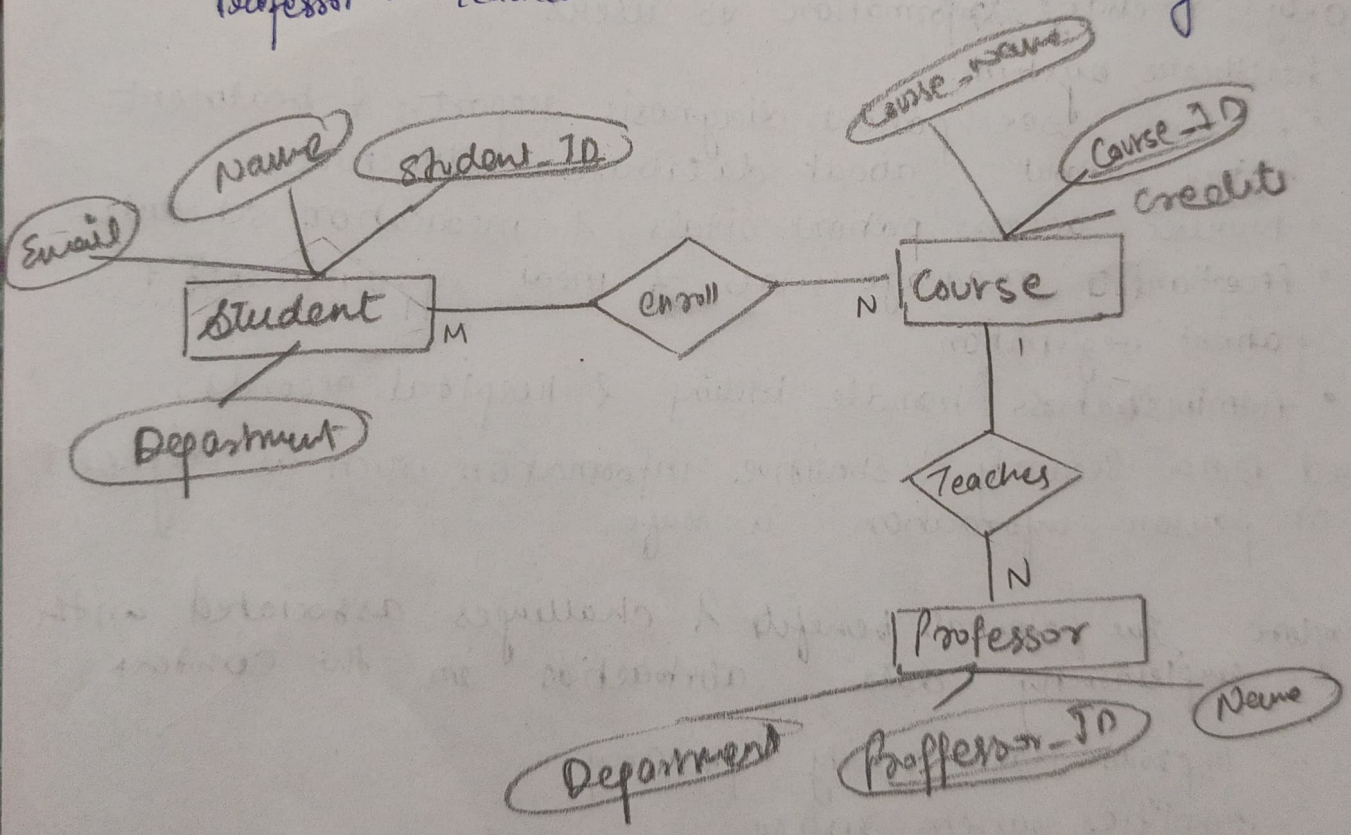
Entities & Attributes

Student -
- Student ID
- Name
- Email
- Department

Course -
- Course_ID
- Course_Name
- Credits

Professor -
- Professor_ID (PK)
- Name
- Department

Relationship

Student - Enrolls - Course - Many to Many


Professor - Teaches - Course - One to Many.
